Card & Payments

CAREER SUMMARY

Company	Position/s Held	Date
Network International Payment Services (Pty) Ltd	Test Analyst Intern	1 Oct 2024 – 30 Sep 2025

CAREER HISTORY

Employer:	Network International Payment Services (Pty) Ltd
Client:	FDH Bank (Malawi), CBZ Bank, DTB Bank (Kenya), I&M Bank (Kenya)
Nature of Business:	Card & Payments
Period:	1 Oct 2024 – 30 Sep 2025
Job Title:	Test Analyst Intern
Responsibilities:	• Testing Execution: Performed functional, regression, and API testing on digital payment solutions (POS, MOTO, e-commerce), ensuring accurate and reliable transaction flows. • Platform Expertise: Tested issuing platforms for credit, prepaid, and debit cards across multiple African banks, deepening knowledge of regional payment ecosystems. • Test Lifecycle Management: Developed, executed, and maintained test plans, cases, and scripts (manual and automated) to validate core payment functionalities and compliance with banking standards. • Quality Assurance: Applied UAT and regression testing to successfully support rollouts of new features in card issuing and payment platforms. • Defect Management: Collaborated with development and business teams to efficiently identify, log, and resolve defects, significantly improving product quality. • Backend Validation: Conducted integration testing and utilized SQL/PostgreSQL queries to validate transaction data and backend system integrity. • Process Adherence: Leveraged QA methodologies, SDLC, and STLC best practices to ensure structured, high-quality testing processes. • Cross-Functional Collaboration: Participated in design reviews, Agile ceremonies, and requirement analysis, providing QA insights to prevent defects early in the lifecycle. • Compliance: Ensured strict compliance with QA best practices, banking regulations, and industry standards, safeguarding transaction integrity and security.
